

We claim:

2 1. A method of registering homeopathic information
3 comprising the steps of:

4 (a) obtaining an analog electromagnetic spectrum
5 representing homeopathic information;

6 (b) digitizing said analog electromagnetic spectrum to
7 produce a digitalized spectrum containing said homeopathic
8 information; and

9 (c) storing the digitalized spectrum on a data-storage
10 medium with a data processor in a digital music compression data
11 format for digital communication and reproduction of music.

1 2. The method defined in claim 1 wherein said data
2 format is an MP3 format.

1 3. A method of using homeopathic information,
2 comprising the steps of:

3 (a) storing homeopathic information in a form of a
4 plurality of electromagnetic homeopathic spectra at a site;

5 (b) accessing said site and selecting at least one of
6 the stored plurality of homeopathic spectra with a global
7 computer information network from a location other than said
8 site;

4 8. The method defined in claim 3 wherein said analog
5 signal is applied to an electrode or antenna.

1 9. The method defined in claim 8 wherein the analog
2 signal is homeopathically applied in step (e) to a carrier
3 selected from a liquid, a salve base or globuli in a direct
4 vicinity of the electrode or antenna for preparing a homeopathic
5 medicament or test substance.

1 10. The method defined in claim 3 wherein the
2 electromagnetic spectra are stored at said site by:

3 (a1) obtaining an analog electromagnetic spectrum
4 representing homeopathic information for each of a number of
5 medical symptoms and physiological indications;

6 (a2) digitizing each of said analog electromagnetic
7 spectra to produce a respective digitalized spectrum containing
8 the respective said homeopathic information; and

9 (a3) storing all of the digitalized spectra on a data-
10 storage medium at said site in a digital music compression data
11 format for digital communication and reproduction of music.

1 11. The method defined in claim 10 wherein said data
2 format is an MP3 format.

1 12. An apparatus for reproducing homeopathic
2 information in a form of electromagnetic oscillation, said
3 apparatus comprising:

4 a data processor having a data storage medium in which
5 homeopathic information is stored as digitalized spectra on a
6 data-storage medium in a digital music compression data format
7 for digital communication and reproduction of music;

8 a digital-to-analog converter for converting a
9 homeopathic spectrum recorded in said data storage medium to an
10 analog signal; and

11 a device for amplifying and homeopathically applying
12 the analog signal to output corresponding electromagnetic
13 oscillations.

14 13. The apparatus defined in claim 12 wherein said
15 device is connected to an analog output of a component of said
16 data processor for reproducing digitally recorded music.

17 14. The apparatus defined in claim 13 wherein said
18 component is an MP3 player.

19 15. The apparatus defined in claim 13, further
20 comprising means for connecting said data processor to a global
21 computer information network by modem or wireless.

1 16. The apparatus defined in claim 15 wherein said
2 global computer information network is the Internet.

1 17. The apparatus defined in claim 16 wherein said
2 component is an internet compatible portable wireless telephone
3 supporting a music reproduction data format.

1 18. The apparatus defined in claim 13 wherein said
2 device includes a magnetic field therapy or magnetic mat unit.

1 19. The apparatus defined in claim 12 wherein said
2 device is a unit generating a weak electromagnetic field
3 modulated by substance specific oscillations corresponding to
4 said electromagnetic oscillations.

1 20. An apparatus for reproducing homeopathic
2 information in a form of electromagnetic oscillations,
3 comprising:

4 a data processor connectable by modem or wirelessly to
5 a global computer information network for downloading digitally
6 recorded electromagnetic spectra carrying homeopathic
7 information;

8 a data storage for said data processor for registering
9 a digitally recorded electromagnetic spectra carrying homeopathic
10 information downloaded from said network;

11 a digital-to-analog converter for converting a
12 homeopathic spectrum recorded in said data storage an analog
13 signal; and
14 a device for amplifying and homeopathically applying
15 the analog signal to output corresponding electromagnetic
16 oscillations.

1 21. The apparatus defined in claim 20 wherein said
2 data processor is provided with a device for measuring
3 physiological parameters of a living being.
